

**(Table 5.2) Course unit description**

<b>Study program:</b> Economics and business management			
<b>Type and level of studies:</b> Master studies			
<b>Course unit: Green entrepreneurship and environment</b>			
<b>Teacher in charge:</b> Nikola Bošković, Jelena Eric Nielsen, Mirjana Knežević			
<b>Language of instruction:</b> English			
<b>ECTS:</b> 8			
<b>Prerequisites:</b> /			
<b>Semester:</b> Winter			
<b>Course unit objective:</b> The aim of the course is to introduce the students with the growing environmental consequences that arise from the development of numerous economic branches, which are manifested in the form of environmental pollution and deterioration of the quality of natural resources. In order to eliminate or alleviate these problems, it is necessary to encourage the development of those entrepreneurial ventures that will contribute to increasing the efficiency of using limited natural resources and preserving the environment. Entrepreneurial ventures aimed at solving environmental problems are only sustainable in the long term, and therefore economically acceptable in the long term.			
<b>Learning outcomes of Course unit</b> Students will be able to familiarize themselves in detail with the economic and ecological indicators of the development of entrepreneurial ventures and be ready to create and manage all aspects and specific challenges of managing green ventures, primarily in the fields of the recycling industry, organic food production, ecological tourism, renewable energy sources and sustainable urbanism. Also, students will acquire basic knowledge about the institutional framework of the development of green entrepreneurship, especially about the legal aspects and regulations of environmental law that regulate this area, which can be significant economic incentives for starting one's own business.			
<b>Course unit contents</b> <b>Lectures:</b> The influence of the economy on the state of environmental elements; Changes in the state of environmental elements as a necessity for the emergence of green entrepreneurship; Defining and basic characteristics of green entrepreneurship; Forms of green entrepreneurship; Legal framework for the development of green entrepreneurship  Practical teaching: Lab classes, other methods of teaching, study research work
