

(Table 5.2) Course unit description

Study program: Economics			
Type and level of studies: Doctoral studies			
Course unit: Market Regulation Policies			
Teacher in charge: Vladan Ivanović			
Language of instruction: English			
ECTS: 9			
Prerequisites:			
Semester: I			
Course unit objective: The objective of the course is to provide students with knowledge of the influence of market concentration in market structure and public interest, regulating tools of market power and control of powerful market structures in economy. Further on, the goal is to introduce students with various experiences and politics of market regulation in developed market economies, contemporary practices and antimonopolistic regulations.			
Learning outcomes of Course unit Acquiring the necessary knowledge and skills students should be able to recognize economic consequences of different market structures and to choose from alternative regulating tools the most efficient one. Because of specific nature of the subject, where economics and law are overlapping, students will acquire multidisciplinary competences.
