| <b>Teaching methods</b><br>Teaching is done through lectures, exercises and independent work of students. In the lectures, students obtain basic information. In the exercises, students acquire practical knowledge and skills to make local and regional plan for solid waste management.  |                       |                        |                       |                      |
